H150-TRG

Heat Recovery Ventilator

PRODUCT **SPECIFICATIONS** & TECHNICAL DATA

PRODUCT DESCRIPTION

Compact size, large performance - the H150-TRG heat recovery ventilator produces approximately 142 CFM at 0.20 in.w.g (ESP) and recovers heat through its high-efficiency polypropylene core. The H150-TRG has been thoughtfully engineered for simple installation in apartments, condos, and small houses. The removable collars are top-mounted, which makes the unit both narrow and shallow enough to fit inside standard closets and other tight spaces.

The H150-TRG has two exclusive features. EvacMAX[™] provides on-demand boost for maximum ventilation. With FLEXControl, airflow circuits can be calibrated electronically, eliminating the need for resistance-inducing balancing dampers and improving overall efficiency.
