

Understanding the solution

WHAT IS HEPA AND HOW DOES IT WORK

High Efficiency Particulate Arrestance is a standard created by the US Atomic Energy Commission. 99.97% of particulate 0.3 micron in size and larger must be removed from the air to achieve true HEPA results.

Amaircare HEPA filters are made from fine fibers that are pressed together into a paper material then pleated to provide the largest surface area possible. The paper then acts like a net that captures and holds particles as the air passes through.

PERFECT SEAL HEPA™

Not all HEPA filters perform equally, in fact; many do not achieve true HEPA results. Amaircare's Perfect Seal technology meets and exceeds true HEPA standard!

V.O.C. (Volatile Organic Compounds) REMOVAL

Carbon is to V.O.C.'s as what a sponge is to water. When V.O.C.'s come into contact with the carbon filter, they become trapped in tiny capillary passages on the surface of the carbon. This process can continue until all the passages are filled, much like saturating a sponge. The larger the surface area of the carbon, the more V.O.C.'s it can hold.

UPGRADED V.O.C. CANISTERS

All Amaircare HEPA systems have an optional V.O.C. Canister for added V.O.C. filtration. These canisters have a much larger surface area which results in both higher V.O.C. capture rate and longer filter life.

V.O.C. Canisters typically last for one full year before needing replacement.

CENTRAL SYSTEMS

Enjoy clean air in every room! Amaircare has a full line of HEPA systems designed for whole home installation.

PORTABLE HEPA
AIR FILTRATION SYSTEMS

Amaircare HEPA filtration systems help solve all 3 categories of air pollution.

UNDERSTANDING AIR POLLUTION

Air pollution can be divided into 3 categories:

PARTICULATES

Air pollutants that have mass, such as: vehicle emissions, pollen, dust mite carcasses & feces, pet dander, cigarette smoke & candle char.

BIOBURDEN

Biological material, living or dead, in the air, such as: bacteria, viruses, mold spores and fungi. These materials could cause allergies or spread diseases.

V.O.C.'s

(VOLATILE ORGANIC COMPOUNDS)

The gas state of chemicals. In your home they come from household materials and cleaning products. V.O.C.'s are released from: paints, perfumes, plastic, furniture & carpets and glue to name only a few.

FIX THE PROBLEM

Amaircare HEPA Air Filtration Products employ simple technology to solve the 3 categories of air pollution.

Amaircare products include HEPA filter media as part of a 3-stage filtration process.

- 1st stage: PREFILTER filters large particulate and captures some V.O.C.s
- 2nd stage: HEPA FILTER filters bioburden, particulate and captures some V.O.C.s
- 3rd stage: INNER CARBON FILTER captures V.O.C.'s

When your health is this important - get the best!

Roomaid Mini

Amaircare's smallest HEPA system. Perfect for small rooms such as a Nursery. Available in 4 fun colours: Blue, Green, Pink, Orange. Matching Auto Kit available.

Delivered Airflow: 16-32 C.F.M. (Cubic Feet per Minute)
Dimensions: 8.5" round, 6.125" high
Control: 3 position, 2 speed switch
Outflow: 360°

Filter Life:
Prefilter: Washable - 12 months
HEPA Filter: 2-5 years
V.O.C. Puck: 12 months

Roomaid

Amaircare's small, but mighty HEPA system. Perfect for offices or in your hotel room while travelling. Auto Kit available.

Delivered Airflow: 20-40 C.F.M. (Cubic Feet per Minute)
Dimensions: 8.5" round, 7.5" high
Control: 3 position, 2 speed switch
Outflow: 360°

Filter Life:
Prefilter: Washable - 12 months
HEPA Filter: 2-5 years
V.O.C. Filter: 6 months
Optional: V.O.C. Puck: 12 months

2500

One of Amaircare's most popular portable systems. Good for cleaning large rooms or specific areas.

Delivered Airflow: 175 C.F.M. (Cubic Feet per Minute)
Dimensions: 16" hex, 13.5" high
Control: Electronic Keypad
Outflow: Vents on 4 (of 6) sides, vented downward

Filter Life:
Prefilter: 4 months
HEPA Filter: 2-5 years
V.O.C. Filter: 6 months
Optional: V.O.C. Canister: 12 months

3000

Amaircare's most powerful portable system. Good for cleaning very large rooms or several open rooms.

Delivered Airflow: 225 C.F.M. (Cubic Feet per Minute)
Dimensions: 16" hex, 23" high
Control: Electronic Keypad
Outflow: Vents on 4 (of 6) sides, vented downward

Filter Life:
Prefilter: 4 months
HEPA Filter: 2-5 years
V.O.C. Filter: 6 months
Optional: V.O.C. Canister: 12 months

TESTIMONIALS

Product: Amaircare Roomaid

"We ordered two of these units, one for my granddaughter who has allergies and one for ourselves - I have allergies and Bronchial asthma. I like the idea that I can move it from room to room."

Mrs. Maureen Coyle

Product: Amaircare 2500

"Noticed a difference right away, I have cats."

Marjory MacLean
