

SteelCrest

INTELLIGENT DESIGN

Capabilities Guide

MADE IN THE USA

If you envision it, SteelCrest can craft it.

In designing extraordinary environments, it's the details that make the difference. The fine points that produce the feeling of superior quality, comfort and sophistication. If you can imagine it, SteelCrest can manufacture it. From decorative registers and grilles, to door and window inserts, to access and architectural panels, SteelCrest has the capability and passion to bring it into being.

At SteelCrest, we share your taste for excellence. All of our products are designed to exacting standards of form, function, style and strength. Enhance home and work settings with exceptional accents. Every single aspect of the space you're designing deserves only the finest in materials and craftsmanship. Because we stand by every piece we produce, SteelCrest's quality will stay with you for life.

“ Our SteelCrest registers look awesome! Due to the age of our home (1940's), most of the registers had to be custom-sized; and what an incredible difference they make.”

Candy Williams | Phoenix, AZ

THE STEELCREST STORY

HISTORY

SteelCrest was born out of a dissatisfaction with existing product lines in architectural accents and the passion to provide true quality. Beginning with a focus on decorative, high-end registers, SteelCrest set out to establish a company capable of producing functional art; manufacturing and delivering exceptional craftsmanship in extremely short turn-around times. Keeping the needs of a wide range of clients in mind, we honed our skills and stuck to our principals.

The word spread quickly about our company because we provided the beauty and functionality homeowners were looking for, while meeting the exacting standards of contractors and installers. Moving beyond the HVAC industry, SteelCrest expanded its product line to include cabinet inserts, window treatments, and door inserts, along with recessed control panel boxes and access panels.

Now, over a decade later, architects, engineers, builders, interior designers and property owners have all come to appreciate the SteelCrest name and what it means in terms of quality and craftsmanship.

HVAC REGISTERS

Air Supply Registers & Return Air Grilles

Whether you're looking for a piece that fits in perfectly with your turn-of-the-century decor or an accent that sets off your modern art deco home, SteelCrest offers a complete range of HVAC registers that not only look great, but also provide unparalleled airflow and function. We also offer comprehensive customization services, from replicating classic historical patterns on renovations to including company logos on commercial products, SteelCrest encourages creativity and style.

HVAC REGISTERS

Finish: Dark Roast
Design: Presidential
Type: Sidewall Air Supply

BRONZE *Series*

BRONZE SERIES

Finish: Brown
Design: Tuscan
Type: Air Supply Register

Available in Tuscan, our most popular design, most standard sizes, and in our three most popular finishes.

This Series of decorative registers and grilles are easy to install and ready when you need them. They also typically cost 40% less than most custom registers on the market.

Standard thickness of 18 gauge steel is used on all supply registers and return grilles. Supplies include an attached air control damper.

Tuscan Design

- 3** Finishes
- 17** Supply Sizes
- 24** Return Sizes
- 2** Exhaust Fan Sizes
- 8** Filter Frame Sizes

Works with all Accessories

Comes with color matched mounting screws

SILVER *Series*

SILVER SERIES

Finish: Oil Rubbed Bronze

Design: Tuscan

Type: Sidewall Air Supply

Looking for our most popular series? The Silver Series has six designs, styles vary from modern to traditional, and the option to choose from one of five finishes to match your decor, including the much-requested oil-rubbed bronze finish.

Standard 1/8-inch thick steel is used on all supply registers and return grilles and supplies include an attached air control damper.

CRAFTSMANSHIP:
A COMMITMENT MADE IN STEEL

Because we manufacture 100% in-house, everything we sell is subject to our rigorous standards of excellence. Quality control is a way of life at SteelCrest.

The closer you look, the more you'll appreciate our work. When you place an order with SteelCrest, you know you're getting the best crafted metal work available today. Our products are custom made and delivered ready to install, with no detail left to chance.

DOOR & WINDOW INSERTS

Our custom designed inserts go beyond the traditional (and pricey) stained glass insert to provide a stunning accent to your home's cabinet doors and windows. We'll match your existing look or help you customize an original pattern with these easy to order, easy to install products that are perfect for new construction, home renovations, or simple home improvement/spruce-up projects.

MADE FOR LIFE:
STEELCREST'S LIMITED LIFETIME
WARRANTY

SteelCrest stands behind everything we do. That's why we offer a limited, lifetime warranty on absolutely everything we sell. From the minute it leaves our factory until the end of time, if it's a SteelCrest product, it's covered. If you ever have any problems with one of our products, we'll make it right. That's how confident we are in the quality we deliver.

ACCESS PANELS

Our access panels feature a hinged door and either a louvered backer to allow airflow, a solid metal backer to prevent noise and air transfer, speaker cloth backer to cover sub woofers, and wire mesh backer for crawl spaces. We offer over 30 ornamental designs, or we can custom design the door you want to fit into your décor. Our concealed hinges won't bend or bow under the weight of the decorative door. There is no better way to access elegance.

CONTROL BOXES

Turn your thermostat, media controls, or lighting controls into a distinctive, architectural accent with our custom made recessed control panel boxes. With a wide range of standard colors, our signature concealed hinge, and an optional key lock, you can make what used to be a utilitarian necessity into another carefully crafted detail in your home or workplace. And of course, they seamlessly match any and all other SteelCrest products you might opt for.

HAND-FILING: THE BEST OF OLD AND NEW

SteelCrest blends old world craftsmanship and cutting-edge technology. While we use the latest in computer-aided design and laser manufacturing, we also hand file pieces when necessary to remove any small flaws or rough edges. In today's cookie-cutter world, SteelCrest stands out by taking the time to make sure everything we make is worthy of an honored place in your home.

ARCHITECTURAL PANELS

Shape your space to suit your priorities. From room dividers, to security doors, to decorative accents and external wall panels. If you can visualize it, we can construct it. With SteelCrest, you're not limited to punched patterns or flat screens. We can execute any shape or pattern, including radius forms, to fit your unique space, indoors or out.

DESIGN SENSIBILITY:
THE UNITY OF FORM AND FUNCTION

Whether you have a finished design you need us to execute, or you just have the seed of an idea and are looking for suggestions for a finished product, we're here to help. At SteelCrest, we view the creative process as a collaboration, bringing together all relevant elements to arrive at a true unity of form and function. We provide the engineering know-how to produce exactly what you're looking for—pieces that are as structurally sound and technically functional as they are attractive.

COMMERCIAL

Creating innovative architectural solutions for the commercial industry is a large part of what SteelCrest does on a daily basis.

When we design extraordinary commercial interiors and exteriors, the difference is in the details.

At SteelCrest, we not only share your desire for excellence, but we also have the design creativity and the experience to make your dreams into reality.

SteelCrest offers a remarkable array of architectural panels, decorative T-Bar/Lay-In registers, linear supplies, ornamental return grilles and other amazing products that are only limited by your imagination.

We invite you to bring us your ideas and partner with our knowledgeable and skilled design team to create the inspiration for your next project.

Our satisfied customers are a diverse client base that includes:

Hilton Hotels:

Mesa Hilton, AZ & Downtown San Francisco

Disney Resorts:

Aulani Resort Hawaii, various other Florida locations

Latter Day Saints:

Temples in Gilbert, AZ and Phoenix, AZ

US Air Force:

Davis-Monthan Base

West Point Academy:

Quarters 100, Superintendent's home

Army Navy Country Club:

Arlington, VA

Kennedy Center:

Washington, DC

and many more.

ACCESSORIES

Because they should perform as good as they look!

Available on all SteelCrest product lines, and priced separately, these enhancements will add that extra detail of functional beauty. All Accessories are designed to work with your HVAC system to maximize appeal and performance.

OPPOSED BLADE DAMPERS (OBD)

Because your supply registers should work as good as they look, the controls are recessed behind the face of the register to keep the beauty unobstructed. OBD's allow you to modify the amount of airflow in a room.

CONCEALMENT LOUVER

SteelCrest's exclusive concealment louver is a valuable accessory for any return grille by concealing unsightly ductwork behind the grille's face without impeding airflow.

AIR DEFLECTORS

Often airflow requirements on a project necessitate the need for air deflection. SteelCrest's air deflectors are a simple option when 1, 2, 3, or 4 way blow patterns are needed. Works with OBD to help control airflow.

WIRE MESH BACKER

Often SteelCrest products are used in outdoor areas where bugs may have access. SteelCrest's wire mesh backer adds an important barrier on any product when the need arises.

SPEAKER CLOTH

Typically offered in either black or white, the speaker cloth backer transforms our product into amazing speaker grilles in any size or shape.

SOLID BACKER

A solid backer on any of our products blocks airflow and noise and is typically mounted on the 3/4-inch frame and powder coated black giving the void look behind the grille face.

BEVELED EDGE*

Useful in softening the appearance of any supply or return, or simply preventing a stubbed toe on a floor grille, our beveled edge is affordable, useful and elegant in detail.

**Not available in Bronze Series*

DESIGNS

We offer you a variety of 30+ unique standard grate styles and 14 standard color options to choose from so your registers are as unique as you.

BRONZE series

1 Design

SILVER series

6 Designs

GOLD series

30+ Designs:
All standard designs

PLATINUM series

Unlimited designs and finishes.

With the Platinum series the sky is the limit. We will do any custom design, finish and custom size to fit your needs.

THE DIFFERENCE IS IN THE DETAIL.

Why do we include custom-manufactured mounting screws? Simply because we saw it could be done better. We tool our mounting screws with a needle-point tip, making them able to pierce the hard-to-penetrate metal edges in drywall. Our custom screws are also color matched with every product. While these screws may seem like a small detail, they allow our products to fit tight to the walls, integrating them perfectly into any décor.

Expanded Designs

Expanded Tuscan

SteelCrest's exclusive Expanded Designs are a larger, more open design, specifically for our Insert Products. Design elements are typically 3-4 times larger, and allow more visibility through the insert face. Inserts can be made with tighter HVAC designs as well if requested.

Please visit the website to see more Expanded Designs.
