

Reduces Wait Time - Saves Water - Saves Energy - Easy Installation

Formerly Metlund®

Got Hot Water?®

Delivering Hot Water Recirculation Since 1992

Benefits:

Saving Water & Energy Is Saving The Environment

- Waiting for hot water can waste 15-20k gallons of water annually per household

Convenience

- On D'MAND® hot water at your faucet, shower, appliances
- High performance pump – moves faster for all heating elements

Financial Savings

- Water costs are rising as the resource is diminishing - saving water saves MONEY
- Energy costs are rising- stop running when you're not home causing wear & tear
- ACT D'MAND KONTROLS® pays for itself within 2-3 years
- Timer & Aquastat systems waste energy - Which Costs MONEY

Flexibility

- One model for all traditional tank, tankless heaters & heat pumps
- New Construction, Retrofit and Small Commercial
- Installs on a loop or Under-sink
- ACT Kontrols™ Plugs into existing timer based pumps for ultimate sustainability
- Runs when you tell it to run

*All this with a 5 year warranty on all systems and 1 year on accessories

How Long Are You Waiting For Hot Water?

Formerly Metlund®
