

Outdoor Circulator

Aqua-Shield™ AMR-SFV1AXLT1 & AM7-SUV1AXLT1 AMR-SFV1XLT1 & AM7-SUV1XLT1

Patent Pending

The AMR-SFV1AXLT1flanged & AM7-SUV1AXLT1 union circulator with outdoor control box is designed for the recirculation of domestic hot water on systems with externally mounted tankless hot water heaters. The circulator is supplied with both a built-in timer and a built in *Aquastat to minimize heat loss from the hot supply and hot water return lines. A built-in check valve stops hot water from flowing to the point of use via the return line. A standard grounded 115V cord and plug allows the circulator to be plugged into a standard 115V grounded receptacle. The circulator is freeze protected. Freeze protection starts the circulator to the normal operation when the temperature raises. The circulator is intended to be installed outdoors against a structure with the control box cover facing up. Tabs are included on both the control box cover and base that allow the box cover to be secured against rain, wind and tampering. Filters protect the control from insects & bugs.
