

Master Flow EZ Cool™ Plug-in Power Attic Vent

Help remove damaging heat and moisture from your attic and protect your roof system from premature deterioration

- Conveniently plugs into a standard 110v electrical outlet in the attic
- Helps eliminate hardwiring and the need for an electrician
- High-efficiency motor with preset thermostat

Master Flow EZ Cool™ Plug-in Power Attic Vent

Roof Mount
models # EZCR1/EZCRHT1

Available
option

Benefits:

- Plugs into a standard 110v grounded electrical outlet in the attic, helping eliminate the need for hardwiring and expensive, hard-to-schedule electricians
- Extra-long 25' (7.62 m) power cord with plug for optimal flexibility when selecting a location for your vent
- Includes a factory-preset thermostat to reduce hassles and help ensure the vent operates when you need it most. Also available with optional Humidistat/Thermostat control.
- High-efficiency PSC motor
- Available with optional Master Flow QuickConnect™ Wi-Fi Technology which allows you to wirelessly control the vent from virtually anywhere (with an internet connection) via your smartphone or tablet⁴
- Galvanized-steel construction for durability
- Passes the 110 mph wind-driven rain test under controlled laboratory testing per TAS 100-(A)
- Eligible accessory product in the Attic Ventilation category of GAF residential enhanced warranties²

Balanced Attic Ventilation:

Balanced attic ventilation means there's an equal amount of air entering it as there is exiting it. The amount of exhaust ventilation at or near the ridge must **never** exceed the amount of intake ventilation at or near the soffits. A minimum of 1 sq. ft. of net

free ventilation for every 300 sq. ft. of attic floor space is recommended, but always consult local building codes to ensure compliance with local ventilation requirements. For more information, visit gaf.com/ventcalculator and see the chart below.

Also available in Gable Mount models. See specifications chart below for further details.
