

RESIDENTIAL EQUIPMENT DETO2 WIRELESS TIMER

FEATURES

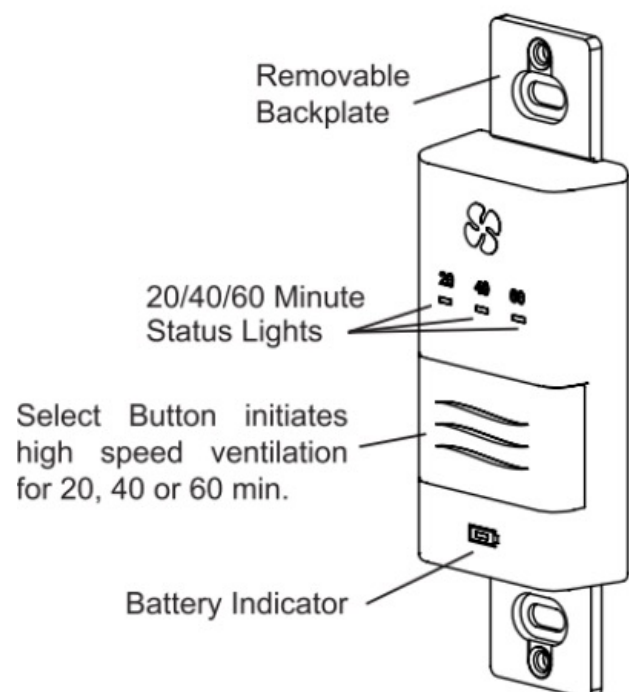

- Wireless Timer
- 20/40/60 Minute status light indicator
- Select Button
- Battery Indicator
- Estimated range of 40 ft with no obstructions
- Compatible with BC02, BC03, BC04, DXPL03
- The timer will override the operational mode of the control (regardless of the setting) and initiate HIGH fan speed Ventilation for 20, 40 or 60 minutes. The HRV/ERV will return to the selected operational mode and fan speed setting upon completion of the timer cycle.

Icon	Function	Description
	Select Button	Press the Select Button on the timer to initiate high speed ventilation for 20, 40, or 60 minutes.
	20/40/60 Minute Status Light	The 20/40/60-minute status lights indicate high speed operation for the selected ventilation duration. To cancel the high-speed fan operation, press the Select Button until the 20/40/60-minute status lights are no longer illuminated.
	Battery Indicator	When the battery in the timer needs to be replaced, the red LED Battery Indicator will illuminate.

Note: When paired to the digital wall control, the wireless timer may be moved to a remote location in the home such as a bathroom. Wireless timers have an estimated range of 40 ft with no obstructions.

OPERATING INSTRUCTIONS

- Press the Select Button to start HIGH speed ventilation for 20, 40, or 60 minutes.
- The corresponding 20/40/60 status light will illuminate to indicate active ventilation.
- Press the Select Button again until no status lights are illuminated to cancel operation.
- When the battery is low, the red LED Battery Indicator will illuminate.
- The wireless timer may be relocated within the home (range approximately 40 ft with no obstructions).

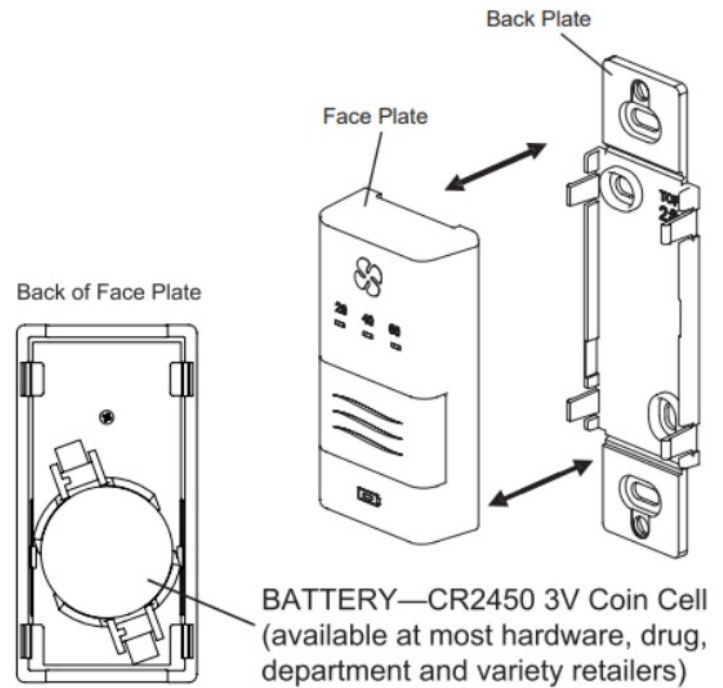

RESIDENTIAL EQUIPMENT DETO2 WIRED TIMER

REPLACING THE TIMER BATTERY

Attention

- Be careful not to damage the tabs on the back plate when re-attaching the face plate.
- Wireless timers and repeaters must be paired to the main control of the HRV.
- Multiple timers and repeaters can be paired to a single main control.
